**Central Administration for Pharmaceutical Products  
General Administration of Veterinary Pharmaceuticals**

**Procedures for Submitting a request to Complete the Registration of  
a Veterinary Product on a Production Batch Instead of a Pilot Batch**

- An application is submitted to the General Administration of Veterinary Pharmaceuticals to complete the product registration procedures on a production batch instead of a pilot batch, after obtaining approval to proceed with the product registration procedures and paying the service fee.
- The company undertakes to destroy the production batch if the studies submitted to complete the product registration procedures are not passed or are rejected.
- The application is reviewed, and a letter of approval is issued by the General Administration of Veterinary Pharmaceuticals after the application is fulfilled.

**Note the following:**

- The company may apply to the Central Administration of Pharmaceutical Care for approval of the product's scientific insert immediately after obtaining approval to proceed with the registration procedures.
- Trading of this batch is permitted according to the rules after receiving final registration certificate.
